Providence, RI 02903

At UNFI, safety is our highest priority. We maintain rigorous food safety and quality assurance processes designed to help identify, manage, and mitigate potential food safety risks.

At this time, we have not received any information indicating that products supplied to UNFI are implicated in the ongoing cyclosporiasis outbreak. We are closely monitoring information from public health officials and working with supplier partners to stay informed of any developments.

Customers should continue to follow guidance from their state and local health departments and the CDC.
